Taylor's University

Student Intern

Subang Jaya, Malaysia

May 2023 – June 2023

- Learned WordPress site development under the mentorship of a PhD lecturer
- Created pages, administered the site, managed plugins and troubleshoot issues hands-on
- Gained an understanding of web publishing workflows and content management systems (CMS)

LEADERSHIP

Taylor's International School Student Council

Chairperson (President)

Puchong, Malaysia

Mar 2023 – Nov 2023

- Managed an 11-member committee; organised meetings and set agendas
- Planned and ran Ocean Week 2023 as a cross-club collaboration with the Rotary Interact Club
- Proposed and organised the school's first anti-bullying campaign with the CAmbassadors Programme
- Led initiatives to improve how students report issues to the council and to add microwaves to eating areas
- Presented proposals and updates to the Head of Secondary and the Head of Discipline

Head Representative

Mar 2022 – Mar 2023

- Represented the student body in meetings; gathered policy feedback and presented results at weekly meetings

PROJECTS

Pomorodo Desktop

2026

Electron, React, TypeScript, Vite

github.com/abbasjhanjhi010/pomorodo-desktop

- Built a compact Windows/macOS taskbar Pomodoro app with 25-minute work and 5-minute break modes
- Wrote project documentation with MkDocs; released under the MIT licence

CSC1024 Social Media Content Planner (group project)

2026

Python

github.com/abbasjhanjhi010/CSC1024-Social-Media-Planner

- Built a text-based tool for content creators to plan posts, schedule content, track engagement and generate performance summaries

Athena Greek Coffee House

2026

HTML5, CSS, JavaScript (Web Components)

github.com/abbasjhanjhi010/WEB1201-Athena-Cafe

- Built a responsive multi-page website for a Greek coffee house as the WEB1201 final assessment

calBot

2026

Voiceflow, Make.com, Google Calendar API, Telegram

github.com/abbasjhanjhi010/calBot

- Built an AI assistant that adds events to Google Calendar from messages sent in Telegram

In the Dark (co-authored)

2020

C#, Unity 3D

youtube.com/watch?v=KN9TK5_54eI

- Co-developed a game for Brackeys Game Jam 2020 in C# using the Unity 3D engine
- Published a gameplay demo on YouTube

CERTIFICATIONS

MIT BWSI Git & GitHub Course | MIT BWSI Python Course (2023) | Python (Basic) Certificate
